MEET VIVA WELLNESS ALBERTA

As registered nurses and spin instructors, Britney and Victory bring a unique blend of clinical expertise and holistic wellness to Viva Wellness Drip. United by a shared belief in prevention, balanced living, and the body's ability to thrive with the right support, they created the clinic to offer safe, evidence-informed IV nutrient therapies that restore vitality from within.

Britney's experience as a mother of three, alongside her nursing and fitness background, informs a compassionate, personalized approach to care rooted in trust and connection. Victory brings a strong focus on proactive health, emphasizing nutrition, movement, and foundational wellness to enhance energy, recovery, and long-term well-being.

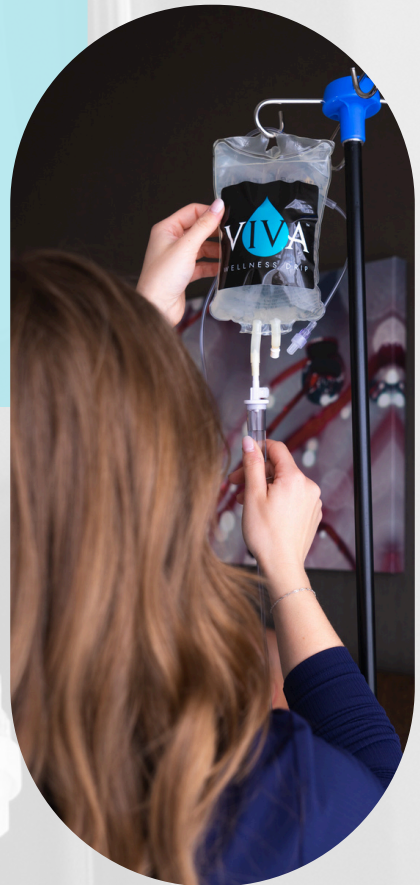

Together, they've created a space where clinical precision meets a holistic mindset—empowering clients to feel their best, take charge of their health, and live more energized lives.

WHY WEDDING WELLNESS MATTERS

Your wedding is more than a single day—it's a series of moments that deserve to be fully experienced.

From the excitement of the night before to the final toast at brunch, VIVA Wellness Alberta ensures you and your guests feel energized, hydrated, and at your absolute best.

Our on-site IV therapy services are thoughtfully designed to support your entire wedding group—including your bridal party, groomsmen, and family—so everyone can show up fully present for every moment that matters.

Weddings are joyful and they can also be physically demanding.

Long days, travel, late nights, and high emotions can leave even the most prepared guests feeling depleted.

VIVA's Wedding Wellness Experience is designed to:

- Restore hydration and energy levels
- Support mental clarity and focus
- Reduce fatigue and post-celebration recovery time
- Help you and your guests feel your best in photos, in moments, and in memories

This is more than a service—it's a shared experience that enhances your entire wedding weekend.
